

EvolveFM 2012.11.01 Release Notes

The biggest improvement to EvolveFM in the 2012.11.01 release is the addition of Preventive Maintenance to the Maintenance module.

As with each quarterly release we've also fixed a number of bugs and added/updated some existing features.

Pay special attention to the install guide on this release as it has changed in the area of IIS/.Net:

- Enabling of Parent Paths(no longer needed)
- Reporting requires an update of .Net along with some IIS settings

Also note the Evolve.inc file is new so you may NOT copy your existing .inc file into its place.

If you are using the included script to upgrade your database you MUST be on the 2012.08.20 or later version of EvolveFM.

New Features

- Preventive Maintenance – Comprehensive preventive maintenance program designer added. You may build your PM schedule now but auto-firing creation of PMs will be included in the next release

Feature Updates

- Reporting – New viewer allows for RDL to be created in newer versions of Visual Studio or Report Builder
- Reporting – Additional RDLs added to RDL folder to be used as templates as well as provide data field and dialog listings(these RDLs have to be added via Reporting Admin if you wish to use them).

Bug Fixes

- Friendlier Login Error notice
- Fix imports so they are not case sensitive on radio buttons(true/false)
- Cleanup mappath code so parent paths do not have to be enabled make the paths a variable in the .inc file.
- Fix image display on comment widget it was only working for Admin
- Fixed grid counts so they were based on data items not objects
- Display both the number and name in a field in all locations where you show cost center info (form/grids)

- Assets –Fixed save/create from grid
- Contacts – First Name Last Name removed from dialog for company
- Drawings - attribute pane fixed to retrieve picture
- Drawings – attribute mapping set to only display UDAs mapped to the appropriate collection
- Drawings - Available seat theme set to use calculated values
- Drawings - Drag and Drop set to update the space the person is leaving for theming
- Drawings - Planview set to honor mapped layers
- Drawings - Add a function to reset the label coordinates to the center of the space(attribute pane).
- Drawings - Theme views rewritten to recognize the new UDAs
- Maintenance - Service Request duplication fixed
- Maintenance -Additional Details passed to WO
- Maintenance -Companies available as labor in maintenance
- Maintenance -Include number in grid when required in form
- Maintenance -Add Labor/Supervisor fixed in dialog
- Platform Admin - Hiding save button hides it permanently on dialog in permissions fixed
- Platform Admin - Adv data Import/Export for tier one set to validate on number only
- Platform Admin - Headcount update has been fixed for advanced import
- Space - FICM Tab filtering fixed on dependent fields
- Space - Arrows in Space dialog fixed
- Space - Allocation fixed to update on removal of space occupant through Space Module

Files

Copy the following before deleting your Current EvolveFM Files but DO NOT overwrite the new files with your backups transfer the paths between the two

\Evolve\Json\Evovle.inc

\Evolve\web.config(if you are using LDAP)

\Evolve\modules\Reporting\ReportViewer\web.config

And the following folders

\Evolve\drawings

\Evolve\documents

\Evolve\user_images

\Evolve\modules\Reporting\RDL

- After backing up delete all files under Evolve
- Copy all files under EvolveFM Release 2012.8.20\Server Files to your evolve installation

Server Scripts

If you update via script you DO NOT need to restore either DB included with this build

- Update 2012.11.01
 - **DO NOT run this if you haven't already run the Update to Evolve.2012.8.20 or later script against your current DB you can determine this by looking at the release info in the lower right hand corner of the EvolveFM screen and seeing if the release info there matches the script name
 - Before running this script on your SQL Server, make a backup of your current database.
 - Script out any custom views.
 - Run this script on SQL Server to update the Evolve database to 2012.11.01 release.

Image Generator

- Evolve Image Generator.msi(only necessary to install if not done for the previous release)
 - Open Evolve Image Generator.msi
 - Follow instructions in the Install Guide
