**Files**

As always make a backup copy your files before overwriting with the Upgrade Files

- Copy all files under EvovleFMupgrade to your Evolve installation

**Server Scripts**

If you update via script you DO NOT need to restore either DB included with this build

- **Update to Evolve 2013.12.1.sql**
  \*\*DO NOT run this if you haven't already run the Update to Evolve.2013.9.1or later script against your current DB you can determine this by looking at the release info in the lower right hand corner of the EvolveFM screen and seeing if the release info there matches the script name

  o Before running this script on your SQL Server, make a backup of your current database.
  o Script out any custom views.
  o Run this script on SQL Server to update the Evolve database to 2013. 9. 1 release.

- **Scheduled PM Generation.sql**
  o If you have run this in a previous release DO NOT run it again
  o See Configuring Maintenance in EvolveFM

**Image Generator**

- Evolve Image Generator.msi(only necessary to install if not done for the previous release)
  o Open Evolve Image Generator.msi
  o Follow instructions in the  Install Guide
