

EvolveFM 2015.8 Release Notes

As with each quarterly release we've fixed a number of bugs and added/updated some existing features.

If you are using the included script to upgrade your database you MUST be on the 2015.4.1 version of EvolveFM.

Bug Fixes

- All query pages – explicitly set to disengage from server at end of query
- Space – Floor dialog fixed no longer changing calculation method to manual on save
- Maintenance – End by Date fixed
- Maintenance – End by # of occurrences fixed
- Platform Admin – Requester dialog permission fixed for Location
- Reporting – Legend generator incompatibility with latest Microsoft server security fixes addressed

Feature Improvements

- Space – Imports – messaging and validation improved
- Space – Calculation Method added to floors grid
- Maintenance – Comments added to email notification
- Maintenance – Multi-Asset WO saved to each Asset on WO
- Platform Admin – Advanced Data Imports – Space Allocation messaging and validation improved
- Evolve Image Generator – Modified to work in HTTPS environments it now has the following settings available

```
<add key="UseHttps" value="false"/>
<add key="HttpsPort" value="8210"/>
<add key="SSLPath" value="c:\"/>
```
- Reporting – web.config altered to include internal server variable to allow separation of report viewer application and Evolve application
- Reporting - web.config altered to include font variable for legend customization

Files

As always make a backup copy your files before overwriting with the Upgrade Files

This upgrade includes changes to the Evolve.inc and the reporting web.config files back up your current files for reference

- Copy all files under Evolve 2015.8 Update to your Evolve installation
** You MUST have updated the files from the previous versions for this method to work for you.
If you haven't done the previous file upgrades use the Evolve Full version.

Server Scripts

If you update via script you DO NOT need to restore either DB included with this build

- **Update to Evolve Update to Evolve 2015.8.1.sql**
**DO NOT run this if you haven't already run the Update to Evolve.2015.4.1script against your current DB you can determine this by looking at the release info in the lower right hand corner of the EvolveFM screen and seeing if the release info there matches the script name
 - Before running this script on your SQL Server, make a backup of your current database.
 - Script out any custom views.
 - Run this script on SQL Server to update the Evolve database to Update to Evolve 2015.8.1 release.
- **Scheduled PM Generation.sql**
 - If you have run this in a previous release DO NOT run it again
 - See Configuring Maintenance in EvolveFM

Image Generator

Your current Image generator must be uninstalled and the new one reinstalled if you wish to take advantage of the HTTPS functionality

- Evolve Image Generator.msi
 - Open Evolve Image Generator.msi
 - Follow instructions in the Install Guide
