Drawings without AutoCAD

For Non AutoCAD Users

Autodesk DWF Viewer is a free viewing application that enables anyone who needs to view, review, and print drawings, specifically non-CAD personnel. It is a fast, easy solution for communicating drawing information.

Benefits for Non-CAD Users

DISTRIBUTE AUTOCAD DRAWINGS...FREE

Quickly & easily share drawings with others without requiring CAD software on their systems, and without requiring CAD expertise.

Securely share designs in a published format with contractors, clients, or other third-party partners.

Save time and money on overnight shipments by sending CAD files electronically.

ELECTRONIC MARKUP ABILITY...FREE

Autodesk's Free DWF Composer enables non-CAD users to quickly review, markup, and round-trip drawings back electronically to the AutoCAD designers.

Speed the review process and save money

Increase productivity with markup Integration

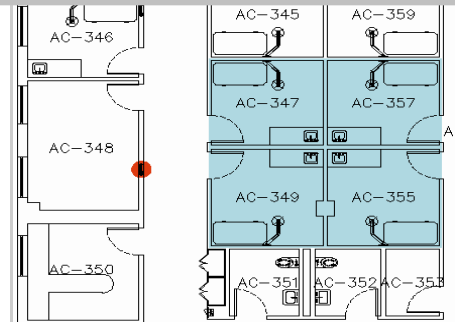

Less room for errors in the markup process

DWF FILE FORMAT VS. PDF FORMAT

Autodesk's DWF file format was designed to handle large quantities of data. It is a highly compressed format, so DWF files are considerably smaller than PDFs and easier to share with downstream users. You can create, open, and navigate DWF files faster, so the review process is much more efficient than it would be with PDF.

DWF - PDF COMPARISON

	DWF	PDF
View Download Size	2.1 MB	15.3/8.7 MB
File Size	69K	1,624K
Creation Time	4 sec	85 sec
Resolution Range	150-60 M dpi	72-4000 dpi
Rendering Speed	0.1 sec	7 sec

DWF TRAINING & CONSULTING

Simple Solutions FM offers training and consulting services based on Autodesk's DWF file format.

Facilities departments can take the AutoCAD native DWG file format and convert it to a transportable DWF file, much like adobes PDF.

DWF Viewer Services

- Consulting services to review the requirements and implementation process of Autodesk's DWF Free tools..
- Training services to get both CAD and non-CAD company personnel up and running using Autodesk's DWF Free tools..
